Career Objective

A Computer Science graduate seeking a challenging opportunity to work for an organization where my skills add value to the organization and expand my learning curve.

Skills

- HTML
- Javascript
- ReactJS
- Git
- CSS
- Photoshop
- Express.js
- Python

Projects

- **D-moovies** – Created a web app for watching movies online using **React.js** with a Watchlist and Rating feature.
  - Implemented Login and Logout feature using **Express.js** and JSON file.

- **TUK-TUK Games** – Two online games –(Tik-Tac-Toe and Snake) using **JavaScript**, **Html** and **CSS**.
- **Know Your Air and Weather** – A web application which detectes your current location and shows it on the map. Also displays the current Weather and Air Quality in your city.
  - Map is provided by **Leaflet.js,** a JavaScript Library. For Weather it uses Accuweather API and for Air Quality it uses OpenAQ API. On Server it uses **Express.js** and some small node packages.
- **Food Ordering website** – Created a web app where users can view item cards and can proceed to checkout after selecting the items. It recommends items based on user's order history.
